Pedigreed Bred Fruit Trees and High Grade  
Nursery Stock for Ornamental  
Purposes Since 1850

---

LANDSCAPE ARCHITECTS

---

One Thousand Five Hundred Acres

A Continued Patronage  
Is Our Constant Aim

## IMPORTANT

This price list cancels all previous lists and is **SUBJECT TO CHANGE WITHOUT NOTICE.**

State grade of stock wanted on every order and in every instance.

Orders received without the initials of customers, or without full and complete address, will be returned.

We reserve the right to cancel all orders on which the reports we get are not satisfactory.

Do not sell any varieties not priced herein.

Our stock is sold for **CASH ON DELIVERY ONLY.**

Six may be sold at dozen rate.

We recognize no agreement not written on the original order sent us—nor do we waive any part of the contract printed on our order blank.

We cannot promise to deliver, or ship orders on any specified date. We cannot accept such orders. The seasonable nature of our business prevents this.

The "Each" price at which the stock is sold must in every case be entered on order, also size of tree or shrub wanted by customer.

We can't afford to guess. We must know just what is wanted and ship as ordered to insure satisfactory service.

---

## FOREWORD

Born in 1850 and still growing, we offer you our seventy-fourth annual price list for Fall 1924 and Spring 1925.

Our customers have changed as generation succeeded generation. We are now selling the grand children of those who bought stock propagated by us in our early days.

In all these years, we have ever striven to be worthy of confidence, in a business where so much depends on the integrity of the seller.

That we have succeeded is proven by our constantly increasing volume of business, and the repeat orders from those who have previously bought "Greening Grown" stock.

We offer you a line of the very highest quality backed by a practical sense of service every day of every week throughout the year.

The Greening Nursery Company  
Monroe, Michigan

**Greening's Own Growing**  
**Carefully Graded**

## **"Pedigreed Trees"**

Read pages 35 to 40 of our catalog which will explain more fully than we can here, what we are attempting to attain in following up the bud selection work we inaugurated in 1907.

Our SUPER-SELECTED Strains are now offered in limited quantity to the growers who have always believed in "like produces like." Who have always known that you could not improve live-stock, fruits or even human beings by using poor "parent material."

The "Parent" or "Mother" Trees used by us from which to cut the buds for propagation are "pedigreed" to the extent that we know what they are doing now and have been doing for at least six years.

We have the records to prove that they are entitled to consideration as trees from which to cut buds for propagation, and we again stress this point which you will please remember:

### **Trees with a Past means Fruit in the Future**

To plant these SUPER-SELECTED Strains we now offer reduces the element of chance; eliminates the unprofitable; enhances quality; increases production, and affords you the opportunity to discontinue the planting of the undesirable.

### **Greenings Super-Selected Strains**

## PEACHES

### Peaches

(Cat. 67-79)

F-Freestone-C-Cling-SC-Semi-Cling

Our peaches are grown from the wild native pits gathered especially for us in the mountains of North Carolina and Tennessee. These are free from peach yellows and "little peach" which are bacteria that can be transmitted by the pit. On these healthy seedling stems we bud our selected buds of the desired varieties.

**SPECIAL:**—All peaches sold for Fall delivery will be 20 cents each extra over and above the prices given herein. We strongly advise the Spring planting of peaches.

**We guarantee all our peaches to grow if planted in the spring. We will not guarantee any peach planted in the fall.**

### Specials in Peaches

\*THE GREAT SOUTH HAVEN  
(Trade Mark Registered in U. S.  
Patent Office).

(Catalog 69-76-80-81)

Our new South Haven peach is so hardy, such a good bearer and so near a perfect market variety, ripening two weeks before the Elberta, and thus extending the season for commercial peaches that it deserves special consideration by every orchardist, who grows peaches commercially. To protect our selves and the customer, no orders will be accepted by us for this variety unless the special agreement covering the sale of all South Haven Peaches is signed by both customer and salesman and accompanies the order. These blanks will be supplied to all our salesmen—should be written in duplicate so that the customer will have one for reference, as well as the original, which must accompany the order.

Hardest of all worth-while commercial sorts. Ask for Special Circular about this peach. Color Yellow. Free-stone.

## Greening's Trees Grow

## **Greening's Own Growing Carefully Graded**

### **Peaches—Continued**

#### **A New Cling—The Gibson THE MOST MERITORIOUS CLING DISCOVERED TO DATE!**

Our effort in locating trees which will qualify as "parent" trees for Greening's SUPER-SELECTED strains brings to us much valuable information regarding varieties.

Knowing that Commercial Canners have long wanted a clingstone peach for canning purposes we were on the lookout for one which would answer the requirements given us by the largest and most experienced Commercial Canners in the United States and Canada.

As concrete evidence of our search we now offer the GIBSON, a clingstone peach of high quality which will hold up when canned, coming out with that most desirable and rich dark yellow color esteemed so highly by Commercial Canners. In an actual test the fruit comes out of the can rich dark yellow in color with a flavor much superior to the very best of California Clings. The size of this peach is also in its favor—it is a large peach and attracts all by its size, beautiful color and unequalled flavor.

#### **Description of the Gibson**

Large, round, highly colored clingstone. Ripens about Sept. 1st or about same time as the New Prolific. The very finest clingstone for home use or for Commercial Canners. Originated on the farm of Mr. C. M. Barden at South Haven, Michigan.

### The Hardest Peach in the World

\* MARQUETTE (Cat. 78)

Color—Creamy White

Freestone

Originated at Marquette, Michigan, located in the upper peninsula. Has withstood intense cold when some varieties of apples have been winter killed. Every home orchard should have at least three trees of this variety. We believe the Marquette can be safely planted in northern Michigan, Wisconsin and Minnesota and locations where apples can be safely grown. The demand for this variety last year was much in excess of our supply and our supply this year is far from being unlimited.

XXX 4 ft. and up     \$1.15 each

### The Greatest Plum Ever Introduced to the American People

\*THE "AUSTRIAN PRUNE" PLUM (Trade  
Mark Registered in U. S. Patent Office)  
(Cat. 81-82)

Our own introduction—Greatest of all plums. The most productive, the finest flavored, the thickest fleshed, the smallest pitted of any plum known to date. Absolutely without equal for dessert purposes. The original tree has now born twenty-four annual crops, with never a failure.

The introduction of a new variety of fruit is costly. We feel that we should have some protection, as well as our customers, so that both the customer and ourselves will get the result and profit from the wonderful quality of the Austrian Prune Plum, therefore, no orders will be accepted for the Austrian Prune Plum unless the special agreement covering the sales of this variety is signed by both customer and salesman and accompanies the order. These blanks will be supplied to all our salesmen—should be written and signed in duplicate so that the customer will have one for reference as well as the original, which must accompany the order.

## STRAWBERRIES

### Strawberries

**Parcel Post C. O. D. Only. Enter Orders on  
Strawberry Order Blanks**

(Cat. 96-98)

We have added a number of the newer varieties to our list for the year, namely, the COOPER, the Aroma, the PREMIER and the BUN SPECIAL.

Of these the COOPER is a large producer of extremely large berries. It is a mid-season variety, bright red in color and of high quality.

The Aroma is still held in high esteem even tho many new varieties have been introduced of late years. Its long fruiting season, good shipping qualities and large berries of firm texture explains why.

The PREMIER is the very earliest to fruit and continues to do so throughout a long season. Large fruits of good color. Noted for its adaptability to various soils and conditions.

The BUN SPECIAL is a very meritorious variety for mid-season. Strong grower. Fruit large to very large.

The blossoms on those marked "(Imp)" are destitute of stamens and need to be fertilized with a perfect flowering variety marked "(Per)" within a radius of not over a rod.

We will not accept orders for less than 25 plants of any variety, NOR CAN WE FILL ORDERS FOR FALL DELIVERY.

Orders must be sent in on special blanks for strawberries and ALL PLANTS WILL be SHIPPED IN PROPER SEASON BY PARCEL POST C. O. D.

Spruce, Norway, 12 to 15 in.	.75	8.00

**Evergreens and Conifers**

\*Mr. Greening commends these varieties for special reasons

## Greening's Trees Grow

**Greening's Own Growing  
Carefully Graded**

## Selected Specimen Evergreens

The following list of Evergreens is selected from the best, well formed trees in the nursery rows. They will be carefully dug with a large Ball of Earth and sewed up with burlap to hold the earth intact, so as to overcome, to a certain extent, the difficulty of transplanting Evergreens often experienced when they are dug and handled in the old way.

Large Evergreens, especially, cannot be transported with any degree of success without being dug with Ball of Earth.

Our Evergreens are grown in heavy soil of a clayey nature. The reason for doing this is that when they are dug for shipment the earth clings to the roots and the root system is not disturbed in the process of digging. Evergreens can be transplanted with success during the spring season.

**Please order them for spring delivery only.**

**Our prices include cost of boxing, also freight charges to destination, and these two points plus the fact that all Specimen Evergreens are dug with ball of earth which is carefully sewed up with burlap should be taken into consideration. Evergreens are not guaranteed.**

## EVERGREEN SHRUBS

(RHODODENDRONS) (Cat. 126)	<b>Evergreen Shrubs</b>
18 to 24 in. (B & B) \$7.50 Each	
In variety. Colors red, pink, white, lavender and blue. Order by color.	
Rhododendrons will not succeed in soils having a limestone base unless special beds are prepared from leaf-mold which may be gathered in the woods. We do not recommend the planting of Rhododendrons in the vicinity of Detroit or else where in limestone soils unless special beds are prepared.	

### \*Chinese Alpine Walnut

(Grafted)

Is a most delicious nut. It is of the English Walnut type—thin shelled; fat kernel with a flavor similar and equal to the best Persian or so-called English Walnut. Hardy. Introduced from Manchuria. Bears early and heavily.

## HARDY FLOWERING SHRUBS

(Cat. 138 to 155)

### Please Note

The Shrubs are alphabetically arranged as in the general catalog under their botanical classifications, but after each the COMMON name is given in caps, where there is a common name.

For quick reference, we give color of bloom, time of bloom and height or other leading characteristics of each variety.

The page of the catalog on which the variety may be found is also given, that fuller description may be had if desired. Thus: (Catalog 120) means the variety will be found fully described on page 120 of catalog. We also price a few varieties in this issue which are not in the catalog.

An index of COMMON names is also given in this price list.

<b>Amelanchier Canadensis</b>	(DOWNY SERVICE BERRY) (Cat. 139) White—May—5 ft. 2 to 3 ft. .... Each      Twelve \$1.25      \$13.20

## Greening's Own Growing Carefully Graded

### ROSES

Catalog 160 to 172)

We guarantee all of our roses to grow if planted in the Spring. We will not guarantee any roses planted in the Fall. Both salesmen and our customers will please note.

We list only the choicest varieties. Any of them will please. But we cannot recommend too highly the following.

Of the **Hybrid Perpetual** sorts:—  
Alfred Colomb, Frau Karl Druschki, Paul Neyron.

Of the **Hybrid Teas**, we offer a group of wonderful roses. Most of them are new, a few old-timers—but none named here can be surpassed in their particular class, color, etc. They are Columbia, Miss Lolita Armour, Los Angeles, Etoile de France, J. L. Mock, Lady Hillington, Lady Ashton, Sunburst, Kaiserin Augusta Victoria, Willowmere and the Gruss en Teplitz where dense floral effect is desired is in a class by itself.

Among the **Pernetiana** roses we commend the Soliel d'Or.

Of the **Climbing** roses, we cannot recommend too highly the Pauls Scarlet Climber, American Pillar, Dr. W. Van Fleet and the Flower of Fairfield.

All of our Roses are carefully packed in damp moss and wrapped in waterproof waxed paper that they may reach destination in good condition.

#### Very Special Varieties

All Heavy 2-year Field Grown Plants

#### Newest Hybrid Teas

(COLUMBIA)

	Each	Three	Twelve
(Hybrid Tea)-----	\$1.50	\$4.20	\$15.00

Color, a beautiful true pink; deepening as it matures to a warm glowing tone, which endures.

\*Push all varieties and sizes preceded by an \*

## Greening's Trees Grow

# Greening's Own Growing Carefully Graded

## Roses—Continued

### LOS ANGELES

	Each	Three	Twelve
(Hybrid Tea)-----	\$1.50	\$4.20	\$15.00

The most beautiful Rose of this generation. The newest and best of all Roses. Color may be described as a flame pink, tinged with coral and shaded with translucent gold at base of petals. Large flowers with long stems. A good rose for cutting.

### MISS LOLITA ARMOUR

#### (HYBRID TEA)

	Each	Three	Twelve
(Hybrid Tea)-----	\$1.50	\$4.20	\$15.00

The flowers are of large size, full double, with petals of great substance, and delightfully fragrant. As the flowers expand they become a deep coral-red, with a golden, coppery red suffusion, the base of the petals a rich golden yellow with coppery red sheen.

### NEWEST CLIMBING ROSE

#### PAUL'S SCARLET CLIMBER (Hardy)

(Cat. 168)

	Each	Three	Twelve
	\$1.50	\$4.20	\$15.00

Winner of Gold Metal as the best of all Climbing Roses at the National Rose Society's Exhibition. Color, brilliant scarlet, shaded crimson, large and very double. Closely allied with Climbing American Beauty as to size and habit. Holds in flower over a long period and the bloom doesn't fade in the sun. Absolutely the finest and newest of all Climbing Roses.

### NEWEST BABY RAMBLER

#### (F. J. GROOTENDORST) (Cat. 170)

Each	Three	Twelve
\$1.50	\$4.20	\$15.00

Refer to catalog 170 for extended description. This Rose blooms all summer; is deep red in color which does not burn or bleach in the sun. Flowers, semi-double medium in size. Strong habit. This rose is a distinct addition which rose lovers will welcome.

Filamentosa**

## Peonies

(Cat. 181 to 184)

“The flower of the Million and the Millionaire”

For massing in beds or for planting in groups in perennial or shrubbery borders where their brilliant hues add beauty to their surroundings the Peony is unequaled. They are perfectly hardy and produce their flowers in great abundance.

Peonies will thrive in any rich soil. As they respond remarkably to feeding, it is suggested that they receive an annual application of cow manure, spading in carefully.

A vast amount of enjoyment can be obtained from a well cared for planting of meritorious varieties.

We feel that we must direct your special attention to the best varieties, namely, Felix Crouse, Mons Jules Elie, Sarah Bernhardt, Festive Maxima and Baroness Schroeder.

After having tested a long list of peonies in our nurseries, we have reduced our propagating list to 27 varieties of which the four above mentioned have outstanding merits.

### Common Peonies

	Each	Twelve
By Color only.....	\$1.00	\$10.00

The earliest of all to bloom. Afford flowers in abundance for Decoration Day. In Two colors only.

# Greening's Own Growing Carefully Graded

## Hardy Perennials—Continued

Cat. 185 to 186)

One of the most satisfactory of all Perennials. No other flower blooms so persistently in July and August. They fill in the gap between Iris and Peony and the fall blooming plants. We offer strong divisions only.

Each	Twelve
\$ .40	\$3.60

ALBION—Pure white with faint red eye.  
 BRIDESMAID—White with crimson eye.  
 BOQUET FLEURI—White, crimson eye.  
 INDEPENDENCE—White dwarf.  
 MISS LINGARD—White Earliest.  
 MMSLLE. PAPE CARPENTIER—(Dwarf)—  
 White. Early.  
 MRS. R. P. STRUTHERS—Rosy carmine, claret  
 red eye.  
 PECHEUR d'ISLAND—Lavender cerise.  
 RYNSTROM—Beautiful pink. Extra fine.  
 RICHARD WALLACE—Pure white, maroon center  
 SUNSET—Dark rosy pink. Fall.  
 THEBAIDE—Salmon red with crimson eye.

**Phlox**

### Greening's Tri-Color DeLuxe Collection Phlox

(See Special Color Plate)

After a careful study of hundreds of varieties of Phlox with special reference to their color, vigor and other important characteristics we have chosen those named below as the three best varieties. These in our opinion are wonderful indeed.

F. G. Von Lassburg—(Pure White).  
 Mrs. Chas. Dorr—(Lavender).  
 Sir Edward Landseer—(Salmon Pink).

Any line of merchandise must have quality or fail of recognition.

Next to quality—buyers of every line stress service. In fact, service today means more than any other word in the language of business.

Broadly speaking, service renders buyers of merchandise that sense of satisfaction in getting one hundred cents for every dollar paid out.

The giving of service spells success for business effort. We know this and emphasize it on every shipment by:—  
“Are you satisfied with Greening stock? No sale is complete unless you are.”

As your success and ours, too, results from mutual endeavor, we ask you as our salesman—our representative—to keep in mind that service cannot be briefly defined.

It is made up of many little things we can do in the interest of our customers, and what benefits them will also help you and us. Taken in every sense the word

## REPLACEMENTS

We do not replace Evergreens under any circumstances. Replacement of other stock is made only to customers who pay cash on delivery and who notify the Company in writing, attaching their duplicate of original order, on or before September 1st, following date of shipment.

With few exceptions, we shall replace all nursery stock that fails to grow as above mentioned. The exceptions will be found in this Price-List, notation having been made herein on stock we do not replace.

The Greening Nursery Company

---

## ABOUT OUR REGISTERED TRADE MARK AND DISHONEST COMPETITORS

Our Trade Mark shown below is placed on every bundle and bale of trees leaving our nursery. This is done that protection may be given to all our customers, and is our guarantee that each tree, shrub or plant, from the time of propagation to the time it is shipped, has had the care necessary to its best growth.

We cannot stamp our name on our products, but we securely attach our Trade Mark thereon, which will protect you against unscrupulous agents and dealers who claim their stock comes from our nursery.

As our salesman you will carry credentials and can prove you represent us.

Reg. Trade Mark

## Our Guarantee

**WE GUARANTEE ALL STOCK TO BE TRUE TO NAME.** We exercise the greatest care to have our stock true to label. Should it occur however, that some stock proves untrue, we will cheerfully replace all such stock, or refund the money paid, after receiving satisfactory proof thereof. It is mutually agreed however, between the purchaser and the party contracting, that we shall not be held liable for damages in such case, further than the replacing of said stock, or refunding the money paid for same.
